■ NeuroBloom – Updated Creative Notes

■ Progress So Far

- Developed light sketch UI including mood entry, archive, and settings.
- Exported PDF mockup for GitHub or visual use.

■ Current Design Themes

- **Mood Expression: emoji-based mood picker**
- **Emotional Reflection: poetic/affirmation-based journaling**
- **Gentle Visuals: calm metaphors like blooming and growth**
- **Neurodivergent-Friendly: sensory-safe, simple UI**

■■ Upcoming Tasks

Task	Description	Priority
GitHub Repo	Set up GitHub project and folders	High
HTML/CSS Demo	Build basic UI wireframe	High
Mood Logging Feature	Build Python or web form for logging	Medium
Mood Visualization	Create mood chart view	Medium
Export/Print Options	Export journal as TXT/PDF	Low
Themed UI Options	Toggle sensory-friendly themes	Low

■ Creative Additions (Exploratory Ideas)

- "Bloom Streaks": gentle rewards for mood logging
- "Petal Reflections": digital petals from each mood
- Reflection Prompts: togglable daily journaling guidance
- Mood Soundscapes: ambient tones by mood (optional)

■■ Visual Assets to Create

- Custom mood icon set (or emoji-style)
- Soft color palette: lavender, blush, beige
- Blooming flower illustrations (growth, petals)
